AMENDMENT UNDER 37 C.F.R. § 1.111 Attorney Docket No.: Q68293

Application No.: 10/048,212

**AMENDMENTS TO THE CLAIMS** 

This listing of claims will replace all prior versions and listings of claims in the

application:

**LISTING OF CLAIMS:** 

1. (currently amended): An immunological latex turbidimetry method for analyzing

an antigen or antibody in a sample, comprising steps of:

(1) bringing a sample which may contain the antigen or antibody to be analyzed into

contact with a protease-treated fragmented bovine serum albumin-consisting essentially of 2 to 9

fragments that reduce a non-specific reaction of latex particles; and

(2) bringing a mixture obtained in the above step (1) into contact with latex particles

carrying bovine serum albumin and an antibody or antigen that specifically binds to the antigen

or antibody to be assayed, and analyzing a turbidity caused by a latex agglutination reaction.

2. (canceled).

3. (canceled).

4. (original): The immunological latex turbidimetry method according to claim 1

wherein the protease is a pepsin.

5. (original): The immunological latex turbidimetry method according to claim 1

wherein the antibody to be analyzed is an anti-streptolysin O antibody, and the antigen carried on

the latex particles is a streptolysin O antigen.

2

AMENDMENT UNDER 37 C.F.R. § 1.111 Attorney Docket No.: Q68293

Application No.: 10/048,212

6. (currently amended): An immunological latex turbidimetry reagent comprising

(1) a first component containing a protease-treated fragmented bovine serum albumin-consisting

essentially of 2 to 9 fragments that reduce a non-specific reaction of latex particles, and (2) a

second component containing latex particles carrying bovine serum albumin and an antibody or

antigen that specifically binds to an antigen or antibody to be assayed.

- 7. (canceled).
- 8. (canceled).
- 9. (original): The immunological latex turbidimetry reagent according to claim 6 wherein the protease is a pepsin.
- 10. (original): The immunological latex turbidimetry reagent according to claim 6 wherein the antibody to be analyzed is an anti-streptolysin O antibody, and the antigen carried on the latex particles is a streptolysin O antigen.
